

Shifting Landscapes

Just as the Earth's ancient patterns and pathways are undergoing seismic shifts, so too are our cultural landscapes—histories are being uncovered, outdated myths discarded, and new stories brought to light. What do we need to orient ourselves when the world we have known is coming undone and new configurations are still taking shape?

Our fourth volume, *Shifting Landscapes*, is woven from this liminal space. Within you'll find stories of changing rivers and migrating forests, blurred boundaries between human and animal, geological landscapes that reveal human histories, and prophecies that weave themselves into the land. The voices gathered in this volume bear witness to the Earth's changing face and respond to her evolving song.

Contributors: David Abram, Anna Badkhen, James Bridle, Jeffrey Jerome Cohen, Russel Albert Daniels, Natalie Diaz, Jamie Figueroa, Ross Gay, Stephen Gill, Bear Guerra, David George Haskell, Katie Holten, Laia Jufresa, Stephanie Krzywonos, Arati Kumar-Rao, Daniel Liévano, Tristan McConnell, N.
